PUBLIC COMMENTS The City Council invites any person with business before the Council to speak. No formal action may be taken on these items at this meeting. Please keep comments to 3 minutes.

Terry Lynch, 5809 Middleton Drive, asked to speak when item #7 was presented, regarding speed limits.

Billy Barron, 6707 Overbrook Drive, wanted to make sure City Council, City Staff and residents were aware of the North Texas Municipal Water District (NTMWD)'s water cleaning processes, more specifically the safety of their water cleaning processes highlighted in recent Dallas Morning News and the Dallas Observer articles. The other item Mr. Barron wanted to address was item #7, regarding speed limits. He said he felt the Ordinance should be passed as presented with Springhill Estates Drive speed limit staying the same. He also stated he felt the City of Parker, Texas' portion of Lewis Lane speed limit was appropriate and residential speed limits changes should be considered if a neighborhood petitions for a change. He noted in no case did he feel the neighborhood street speed limits needed to be increased in any subdivision that is not at least ninety percent (90%) complete.

City Attorney Shelby stated again that the new ordinance did not change any of the established speed limits. The ordinance only added new subdivisions streets that have come into the city since the last ordinance and noted Senior Project Manager Richard Havas, P.E.'s letter, dated February 23, 2018, regarding residential street speed limits. [See Exhibit 4 – Richard Havas, P.E.'s letter, dated February 23, 2018.]

Councilmember Meyer recommended the speed limit for Lewis Lane be set at a safe speed, 40 mph.

Speaking on Agenda Item RE: Speed Limit Ordinance

Chief Brooks in his year end report stated that the biggest problem with speeding in Parker was on Parker Rd. (in amounts over 15mph), so why we are reassessing the speed limits on all of the city residential streets?

If the city feels so strongly that action is needed on various subdivisions speed limits, they should ASK THE RESIDENTS first what they want.

TXDOT's website had information about speed limits that I wanted to share:

- There are two kinds of maximum speed limits. All roadways in Texas have a default speed limit called the prima facie limit based on the type of roadway. 30 mph on residential streets. The speed limit can be changed if the controlling jurisdiction believes that the prima facie limit is unreasonable or unsafe due to conditions on a specific roadway.
- TXDOT recommends that such changes be made based upon a traffic survey that sets the speed at the 85th percentile speed, which is the speed at or below which 85% of the motorists are traveling. Setting the speed limit close to the 85th percentile speed ensures that the speed limit reflects the speed that the majority of drivers consider to be reasonable and prudent based on the conditions.
- Research has shown that speed limits set below the reasonable speed of most drivers do not significantly reduce the number of crashes on a road. In fact, crashes may increase with unreasonably low speed limits.
- There are disadvantages to setting speed limits far below the 85th percentile speed. If reasonable drivers see an unreasonably low speed limit without seeing a need to drive that slowly, they tend to ignore the signs and develop disrespect for speed limits in general.

When a speed limit is set below the 85th percentile, law enforcement officials must deal with reasonable people being ticketed for exceeding the posted limit as well as motorists who drive too fast.

The curvilinear streets noted in the Engineer's letter is a speed management tool that naturally slows drivers down to a safe speed.

Are there problems (accidents or significant reports of speeding) on the residential streets. Also, what is the cost of such signs? I presented these questions to the administrator in an email and have not heard a response to either.

I ask that the council answer the open questions presented above. I also ask that if the council intends to adopt this ordinance they first amend it to allow subdivisions to have the prior limits restated with a petition of 10 residents.

RE: Residential Street Speed Limits

Dear Jeff:

I have been requested to evaluate the speed limit on the residential streets within the subdivisions that I have designed within the City of Parker. This would include the Whitestone Estates, Brooks Farms, McCreary Creek Estates, Dublin Park Estates and the King Crossing developments. Due to the curvilinear streets and the pedestrian traffic, we would recommend a speed limit of 25 mph. This would be consistent with other subdivisions that we have developed throughout the metroplex.

Please contact us if you have any questions or concerns.

Sincerely,

Richard Hovas, P.E.

Re: Sycamore Lane Water Line

Dear Mr. Flanigan:

We have checked the bids received at 1:15 p.m., Thursday, February 22, 2018 for the Sycamore Lane Water Line project. We are enclosing six (6) copies of the Bid Summary and Bid Tabulation.

Eleven bids were received, and it has been determined the two low bidders are not sufficiently experienced to complete the work as required in NCTCOG Standard Specification 102.12 Disqualifications of Bidder. The third low bidder was non- responsive.

The low bidder's qualifications provided from 2013 thru 2017 show paving work and drainage work for various cities. No water or sewer line experience was provided. They provided two current projects for Insurance Auto Auction in which they state full ground up development including buildings but no references. This bidder did not provide a list of equipment being proposed for this project as required in the Qualifications form.

The second low bidder's experience shows one city project for what appears to be a drainage project, the remaining experience is sub consultant work for private companies and the work included high school stadiums, bus barns, wave pool, fleet maintenance and Walmart distribution center. No water line or sewer line experienced was provided. This bidder also did not list any employees working for the company and did not provide a list of equipment to be used on this project.

The third low bidder did not provide any information in the required Qualifications Statement and has been deemed non-responsive to the City's bid requirements.

The fourth low bidder provided evidence that they have water and sewer line experience for several cities in North Texas. This contractor did not provide a list of equipment to be utilized on the project.

The seventh low bidder is the first bidder to provide all information requested in their Qualification Statement and has adequate experience in water and sewer line construction.

We recommend that the City waive the requirement for providing a list of equipment to be utilized on this project resulting in the 4th low bidder, KIK Underground, LLC, meeting the requirements of the qualifications. KIK Underground, LLC of Richardson, Texas submitted the Lowest Bid in the amount of \$946,076.00. We are completing a water line relocation project with the City of Glenn Heights and their contractor, KIK Underground has performed satisfactory on this project.

Accordingly, based on the information we have available to us, we recommend that the City award KIK Underground, LLC a construction contract in the amount of \$946,076.00.

We are available to discuss our recommendation further at your convenience.

Sincerely,

John W. Birkhoff, P.E.
